Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 14 is objected to because of the following informalities: the text contains an obvious spelling error ("susperheating"). Appropriate correction is required.

Applicant's assistance is respectfully requested in correcting any other minor spelling and/or grammatical errors which may be present in the claims.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 9 is clearly intended as a dependent claim, however, applicant's preliminary amendment deletes all references to a preceding claim. The metes and bounds of the claim are thus unclear because the dependency is unclear.

Allowable Subject Matter

Claims 1-8, 10-13 and 15-20 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

The closest prior art appears to be JP 60-45550, cited by applicant in the IDS, which teaches a related process for the synthesis of methylamines from methanol and ammonia (page 7). The reference neither teaches nor suggests the instant technique of passing all or part of the feed gas or product gas stream through an adjustable valve in order to vary the pressure - and thus the reaction temperature - such that a narrow reaction temperature range of 360-370°C is maintained.
